TITLE: JOURNAL OF CELL BIOLOGY

REEL NO: 2 OF 2

VOLUME: 94 ISSUES: 1-3
95 1-3

DATE: JULY - DECEMBER 1982

PUBLICATION NO: 12,246.01

NOTES: INCLUDES ABSTRACTS, INDEXES AND CONTENTS

THIS PERIODICAL MAY BE COPYRIGHTED, IN WHICH CASE THE CONTENTS REMAIN THE PROPERTY OF THE COPYRIGHT OWNER. THE MICROFORM EDITION IS REPRODUCED BY AGREEMENT WITH THE PUBLISHER. DUPLICATION OR RESALE WITHOUT PERMISSION IS PROHIBITED.

UNIVERSITY MICROFILMS INTERNATIONAL, ANN ARBOR, MICHIGAN

AUTHOR INDEX

A

Aggeler, J., and Werb, Z. Initial events during phagocytosis by macrophages viewed from outside and inside the cell: membrane-particle interactions and clathrin. 613.

Alitalo, K., Kuismanen, E., Myllylä, R., Kiistala, U., Asko-Seljavaara, S., and Vaheri, A. Extracellular matrix proteins of human epidermal keratinocytes and feeder 3T3 cells. 497.

Allfrey, V. G. *See* Herlands, Allfrey, and Poccia.

Arnaud, C. D. *See* Silve, Hradek, Jones, and Arnaud.

Arslan, P. *See* Pozzan, Arslan, Tsien, and Rink.

Asko-Seljavaara, S. *See* Alitalo, Kuismanen, Myllylä, Kiistala, Asko-Seljavaara, and Vaheri.

B

Baekkeskov, S. *See* Dyrberg, Baekkeskov, and Lernmark.

Balczon, R. *See* Schatten, Schatten, Bestor, and Balczon.

Barry, B., and Mathies, R. Resonance Raman microscopy of rod and cone photoreceptors. 479.

Bergeron, J. J. M., Kotwal, G. J., Levine, G., Bilan, P., Rachubinski, R., Hamilton, M., Shore, G. C., and Ghosh, H. P. Intracellular transport of the transmembrane glycoprotein G of vesicular stomatitis virus through the Golgi apparatus as visualized by electron microscope radioautography. 36.

Bestor, T. H. *See* Schatten, Schatten, Bestor, and Balczon.

Bhakdi, S., and Tranum-Jensen, J. Terminal membrane C5b-9 complex of human complement: transition from an amphiphilic to a hydrophilic state through binding of the S protein from serum. 755

Biedler, J. L. *See* Lewis, Biedler, and Melera.

Bilan, P. *See* Bergeron, Kotwal, Levine, Bilan, Rachubinski, Hamilton, Shore, and Ghosh.

Black, V. H. *See* Miao and Black.

—, *See* Miao and Black.

Bloom, M. *See* Roy, Bloom, Milos, and Monroe.

Boydston, W. R. *See* Sohal and Boydston.

Brasier, A. R. *See* Miljanich, Brasier, and Kelly.

Brown, B. A. *See* Nixon, Brown, and Marotta.

Brown, B. A., Nixon, R. A., and Marotta, C. A. Posttranslational processing of α-tubulin during axoplasmic transport in CNS axons. 159.

Brown, R. M., Jr. *See* Haigler, White, Brown, and Cooper.

Buchanan, M. *See* Snell, Buchanan, and Clausell.

Burden, S., Identification of an intracellular postsynaptic antigen at the frog neuromuscular junction. 521.

Burgess, D. R., and Prum, B. E. A reevaluation of brush border motility: calcium induces core filament solation and microvillar vesiculation. 97.

Burmer, G. C., Zeigler, C. J., and Norwood, T. H. Evidence for endogenous polypeptide-mediated inhibition of cell cycle transit in human diploid cells. 187.

Burr, B. *See* Burr and Burr.

Burr, F. A., and Burr, B. Three mutations in *Zea mays* affecting zein accumulation: a comparison of zein polypeptides, in vitro synthesis and processing, mRNA levels, and genomic organization. 201.

CONTENTS

VOLUME 94 NUMBER 1 JULY 1982

Perspectives

1 **M. J. Karnovsky, A. M. Kleinfeld, R. L. Hoover, and R. D. Klausner.** Concept of lipid domains in membranes

Regular Articles

7 **L. Smith and R. M. Hochmuth.** Effect of wheat germ agglutinin on the viscoelastic properties of erythrocyte membrane

12 **J. Kaplan and E. A. Keogh.** Temperature shifts induce the selective loss of alveolar-macrophage plasma membrane components

20 **H. Roy, M. Bloom, P. Milos, and M. Monroe.** Studies on the assembly of large subunits of ribulose bisphosphate carboxylase in isolated pea chloroplasts

28 **E. G. Hayman, Å. Oldberg, G. R. Martin, and E. Ruoslahti.** Codistribution of heparan sulfate proteoglycan, laminin, and fibronectin in the extracellular matrix of normal rat kidney cells and their coordinate absence in transformed cells

36 **J. J. M. Bergeron, G. J. Kotwal, G. Levine, P. Bilan, R. Rachubinski, M. Hamilton, G. C. Shore, and H. P. Ghosh.** Intracellular transport of the transmembrane glycoprotein G of vesicular stomatitis virus through the Golgi apparatus as visualized by electron microscope radioautography

42 **B. Westermark and K. R. Porter.** Hormonally induced changes in the cytoskeleton of human thyroid cells in culture

51 **S. Rosenberg and A. Stracher.** Effect of actin-binding protein on the sedimentation properties of actin

56 **T. C. Hohman, P. L. McNeil, and L. Muscatine.** Phagosome-lysosome fusion inhibited by algal symbionts of *Hydra viridis*

64 **C. H. Haigler, A. R. White, R. M. Brown, Jr., and K. M. Cooper.** Alteration of in vivo cellulose ribbon assembly by carboxymethylcellulose and other cellulose derivatives

70 **R. V. Rebois.** Establishment of a gonadotropin-responsive murine Leydig tumor cell line

77 **D. K. Fristrom.** Septate junctions in imaginal disks of *Drosophila:* a model for the redistribution of septa during cell rearrangement

88 **G. P. Miljanich, A. R. Brasier, and R. B. Kelly.** Partial purification of presynaptic plasma membrane by immunoadsorption

97 **D. R. Burgess and B. E. Prum.** A reevaluation of brush border motility: calcium induces core filament solation and microvillar vesiculation

108 **D. Schubert and M. LaCorbiere.** Properties of extracellular adhesion-mediating particles in a myoblast clone and its adhesion-deficient variant

115 **B. Thorens, J. Roth, A. W. Norman, A. Perrelet, and L. Orci.** Immunocytochemical localization of the vitamin D-dependent calcium binding protein in chick duodenum

123 **C. G. Glabe, L. B. Grabel, V. D. Vacquier, and S. D. Rosen.** Carbohydrate specificity of sea urchin sperm bindin: a cell surface lectin mediating sperm-egg adhesion

129 **N. Hirokawa.** Cross-linker system between neurofilaments, microtubules, and membranous organelles in frog axons revealed by the quick-freeze, deep-etching method

143 **J. M. Heiple and D. L. Taylor.** pH changes in pinosomes and phagosomes in the ameba, *Chaos carolinensis*

150 **R. A. Nixon, B. A. Brown, and C. A. Marotta.** Posttranslational modification of a neurofilament protein during axoplasmic transport: implications for regional specialization of CNS axons

159 **B. A. Brown, R. A. Nixon, and C. A. Marotta.** Posttranslational processing of α-tubulin during axoplasmic transport in CNS axons

165 **D. P. Kiehart, I. Mabuchi, and S. Inoué.** Evidence that myosin does not contribute to force production in chromosome movement

179 **G. Tarone, G. Galetto, M. Prat, and P. M. Comoglio.** Cell surface molecules and fibronectin-mediated cell adhesion: effect of proteolytic digestion of membrane proteins

187 **G. C. Burmer, C. J. Zeigler, and T. H. Norwood.** Evidence for endogenous polypeptide-mediated inhibition of cell cycle transit in human diploid cells

193 **E. L. Khoury.** Reexpression of blood group ABH antigens on the surface of human thyroid cells in culture

Rapid Communications

201 **F. A. Burr and B. Burr.** Three mutations in *Zea mays* affecting zein accumulation: a comparison of zein polypeptides, in vitro synthesis and processing, mRNA levels, and genomic organization

207 **M. C. Willingham and I. H. Pastan.** Transit of epidermal growth factor through coated pits of the Golgi system

213 **P. C.-H. Tseng and T. D. Pollard.** Mechanism of action of *Acanthamoeba* profilin: demonstration of actin species specificity and regulation by micromolar concentrations of $MgCl_2$

219 **L. Herlands, V. G. Allfrey, and D. Poccia.** Translational regulation of histone synthesis in the sea urchin *Strongylocentrotus purpuratus*

224 **D. G. Hafeman, L. M. Smith, D. T. Fearon, and H. M. McConnell.** Lipid monolayer-coated solid surfaces do not perturb the lateral motion and distribution of C3b receptors on neutrophils

229 ASCB Placement Service Notices

VOLUME 94 NUMBER 2 AUGUST 1982

Regular Articles

241 **P. Miao and H. Black.** Guinea pig adrenocortical cells: in vitro characterization of separated zonal cell types

253 **E. M. V. Jones-Villeneuve, M. W. McBurney, K. A. Rogers, and V. I. Kalnins.** Retinoic acid induces embryonal carcinoma cells to differentiate into neurons and glial cells

263 **R. E. Stephens.** Equimolar heterodimers in microtubules

271 **P. J. M. Van Haastert, H. Van Walsum, and F. J. Pasveer.** Nonequilibrium kinetics of a cyclic GMP-binding protein in *Dictyostelium discoideum*

279 **B. Van Deurs and K. Nilausen.** Pinocytosis in mouse L-fibroblasts: ultrastructural evidence for a direct membrane shuttle between the plasma membrane and the lysosomal compartment

287 **J. A. Cooper and T. Hunter.** Discrete primary locations of a tyrosine protein kinase and of three proteins that contain phosphotyrosine in virally transformed chick fibroblasts

297 **M. M. Mueckler and H. C. Pitot.** Structure and function of rat liver polysome populations. II. Characterization of polyadenylate-containing mRNA associated with subpopulations of membrane-bound polysomes and messenger ribonucleoprotein particles

308 **P. Laurila, I. Virtanen, V.-P. Lehto, T. Vartio, and S. Stenman.** Expression and distribution of vimentin and keratin filaments in heterokaryons of human fibroblasts and amnion epithelial cells

316 **J. D. Pardee, P. A. Simpson, L. Stryer, and J. A. Spudich.** Actin filaments undergo limited subunit exchange in physiological salt conditions

325 **R. Y. Tsien, T. Pozzan, and T. J. Rink.** Calcium homeostasis in intact lymphocytes: cytoplasmic free calcium monitored with a new, intracellularly trapped, fluorescent indicator

335 **T. Pozzan, P. Arslan, R. Y. Tsien, and T. J. Rink.** Anti-immunoglobulin, cytoplasmic free calcium, and capping in B-lymphocytes

341 **S. M. King, J. S. Hyams, and A. Luba.** Absence of microtubule sliding and an analysis of spindle formation and elongation in isolated mitotic spindles from the yeast *Saccharomyces cerevisiae*

350 **P. E. Fielding, P. M. Davison, M. A. Karasek, and C. J. Fielding.** Regulation of sterol transport in human microvascular endothelial cells

355 **J. C. Samuelson, J. P. Caulfield, and J. R. David.** Schistosomula of *Schistosoma mansoni* clear concanavalin A from their surface by sloughing

363 **J. C. Samuelson and J. P. Caulfield.** Loss of covalently labeled glycoproteins and glycolipids from the surface of newly transformed *Schistosoma mansoni*

370 **J. P. Caulfield, G. Korman, and J. C. Samuelson.** Human neutrophils endocytose multivalent ligands from the surface of *Schistosoma mansoni* before membrane fusion

379 **C. M. Silve, G. T. Hradek, A. L. Jones, and C. D. Arnaud.** Parathyroid hormone receptor in intact embryonic chick bone: characterization and cellular localization

387 **H. Schneider, M. Höchli, and C. R. Hackenbrock.** Relationship between the density distribution of intramembrane particles and electron transfer in the mitochondrial inner membrane as revealed by cholesterol incorporation

394 **B. R. Krawisz and R. E. Scott.** Coupling of proadipocyte growth arrest and differentiation. I. Induction by heparinized medium containing human plasma

400 **R. E. Scott, B. J. Hoerl, J. J. Wille, Jr., D. L. Florine, B. R. Krawisz, and K. Yun.** Coupling of proadipocyte growth arrest and differentiation. II. A cell cycle model for the physiological control of cell proliferation

406 **M. Simioenscu, N. Simionescu, and G. E. Palade.** Differentiated microdomains on the luminal surface of capillary endothelium: distribution of lectin receptors

414 **K. Krauter, L. Leinwand, P. D'Eustachio, F. Ruddle, and J. E. Darnell, Jr.** Structural genes of the mouse major urinary protein are on chromosome 4

418 **J. A. Lewis, J. L. Biedler, and P. W. Melera.** Gene amplification accompanies low level increases in the activity of dihydrofolate reductase in antifolate-resistant Chinese hamster lung cells containing abnormally banding chromosomes

425 **N. Hirokawa, L. G. Tilney, K. Fujiwara, and J. E. Heuser.** Organization of actin, myosin, and intermediate filaments in the brush border of intestinal epithelial cells

444 **E. A. Nothnagel and W. W. Webb.** Hydrodynamic models of viscous coupling between motile myosin and endoplasm in characean algae

455 **G. Schatten, H. Schatten, T. H. Bestor, and R. Balczon.** Taxol inhibits the nuclear movements during fertilization and induces asters in unfertilized sea urchin eggs

466 **J. Condeelis and M. Vahley.** A calcium- and pH-regulated protein from *Dictyostelium discoideum* that cross-links actin filaments

472 **T. Dyrberg, S. Baekkeskov, and Å. Lernmark.** Specific pancreatic β-cell surface antigens recognized by a xenogenic antiserum

Rapid Communications

479 **B. Barry and R. Mathies.** Resonance Raman microscopy of rod and cone photoreceptors

483 **G. F. Schreiner and R. S. Cotran.** Localization of an Ia-bearing glomerular cell in the mesangium

489 **C. Garbi and S. H. Wollman.** Basal lamina formation on thyroid epithelia in separated follicles in suspension culture

VOLUME 94 NUMBER 3 SEPTEMBER 1982

Regular Articles

497 **K. Alitalo, E. Kuismanen, R. Myllylä, U. Kiistala, S. Asko-Seljavaara, and A. Vaheri.** Extracellular matrix proteins of human epidermal keratinocytes and feeder 3T3 cells

506 **L. Chuman, L. G. Fine, A. H. Cohen, and M. H. Saier, Jr.** Continuous growth of proximal tubular kidney epithelial cells in hormone-supplemented serum-free medium

511 **T. Maciag, J. Kadish, L. Wilkins, M. B. Stemerman, and R. Weinstein.** Organizational behavior of human umbilical vein endothelial cells

521 **S. Burden.** Identification of an intracellular postsynaptic antigen at the frog neuromuscular junction

531 **S. J. Suchard, F. A. Lattanzio, Jr., R. W. Rubin, and B. C. Pressman.** Stimulation of catecholamine secretion from cultured chromaffin cells by an ionophore-mediated rise in intracellular sodium

540 **G. S. Sohal and W. R. Boydston.** Influence of neostigmine treatment on embryonic development of acetylcholine receptors and neuromuscular junctions

549 **D. Ring, R. Hubble, and M. Kirschner.** Mitosis in a cell with multiple centrioles

557 **D. P. Witt and J. A. Gordon.** Most iodinatable fibroblast surface proteins accompany the cytoplast membrane during cytochalasin B-mediated enucleation of chick embryo fibroblasts

565 **P. K. Chowrashi and F. A. Pepe.** The Z-band: 85,000-dalton amorphin and alpha-actinin and their relation to structure

574 **A. D. Lander, D. K. Fujii, D. Gospodarowicz, and L. F. Reichardt.** Characterization of a factor that promotes neurite outgrowth: evidence linking activity to a heparan sulfate proteoglycan

586 **B. A. Criscuolo and S. S. Krag.** Selection of tunicamycin-resistant Chinese hamster ovary cells with increased *N*-acetylglucosaminyltransferase activity

592 **L. Milam and H. P. Erickson.** Visualization of a 21-nm axial periodicity in shadowed keratin filaments and neurofilaments

596 **F. Grinnell, J. R. Head, and J. Hoffpauir.** Fibronectin and cell shape in vivo: studies on the endometrium during pregnancy

607 **W. J. Snell, M. Buchanan, and A. Clausell.** Lidocaine reversibly inhibits fertilization in *Chlamydomonas*: a possible role for calcium in sexual signalling

613 **J. Aggeler and Z. Werb.** Initial events during phagocytosis by macrophages viewed from outside and inside the cell: membrane-particle interactions and clathrin

624 **K. L. Carraway, R. F. Cerra, G. Jung, and C. A. C. Carraway.** Membrane-associated actin from the microvillar membranes of ascites tumor cells

631 **E. G. Levin and D. J. Loskutoff.** Cultured bovine endothelial cells produce both urokinase and tissue-type plasminogen activators

637 **W. T. Jackson and B. G. Doyle.** Membrane distribution in dividing endosperm cells of *Haemanthus*

644 **U. Euteneuer, W. T. Jackson, and J. R. McIntosh.** Polarity of spindle microtubules in *Haemanthus* endosperm

654 **J. M. Mullins and J. R. McIntosh.** Isolation and initial characterization of the mammalian midbody

662 **R. G. Tsanev and L. P. Djondjurov.** Ultrastructure of free ribonucleoprotein complexes in spread mammalian nuclei

667 **B. J. Schnapp and T. S. Reese.** Cytoplasmic structure in rapid-frozen axons

680 **C. A. Mannella.** Structure of the outer mitochondrial membrane: ordered arrays of porelike subunits on outer membrane fractions from *Neurospora crassa* mitochondria

688 **J. J. Manfredi, J. Parness, and S. B. Horwitz.** Taxol binds to cellular microtubules

697 **S. L. Tamm.** Flagellated ectosymbiotic bacteria propel a eucaryotic cell

710 **R. D. Vale and E. M. Shooter.** Alteration of binding properties and cytoskeletal attachment of nerve growth factor receptors in PC12 cells by wheat germ agglutinin

718 **J. S. Wood and L. H. Hartwell.** A dependent pathway of gene functions leading to chromosome segregation in *Saccharomyces cerevisiae*

727 **M. E. Stearns and R. L. Ochs.** A functional in vitro model for studies of intracellular motility in digitonin-permeabilized erythrophores

Rapid Communications

741 **K. J. Green and D. L. Kirk.** A revision of the cell lineages recently reported for *Volvox carteri* embryos

743 **S. D. Flanagan, B. Yost, and G. Crawford.** Putative 51,000-M_r protein marker for postsynaptic densities is virtually absent in cerebellum

749 **G. Krohne, R. Stick, J. A. Kleinschmidt, R. Moll, W. W. Franke, and P. Hausen.** Immunological localization of a major karyoskeletal protein in nucleoli of oocytes and somatic cells of *Xenopus laevis*

755 **S. Bhakdi and J. Tranum-Jensen.** Terminal membrane C5b-9 complex of human complement: transition from an amphiphilic to a hydrophilic state through binding of the S protein from serum
